Integration with
Azure Services

A Real-World Fabric Transformation at ZEISS Group

ZEISS Group faced these challenges

Complex and diverse IT landscape

Lack of standardization and interoperability

High maintenance and operational costs

Limited agility and innovation

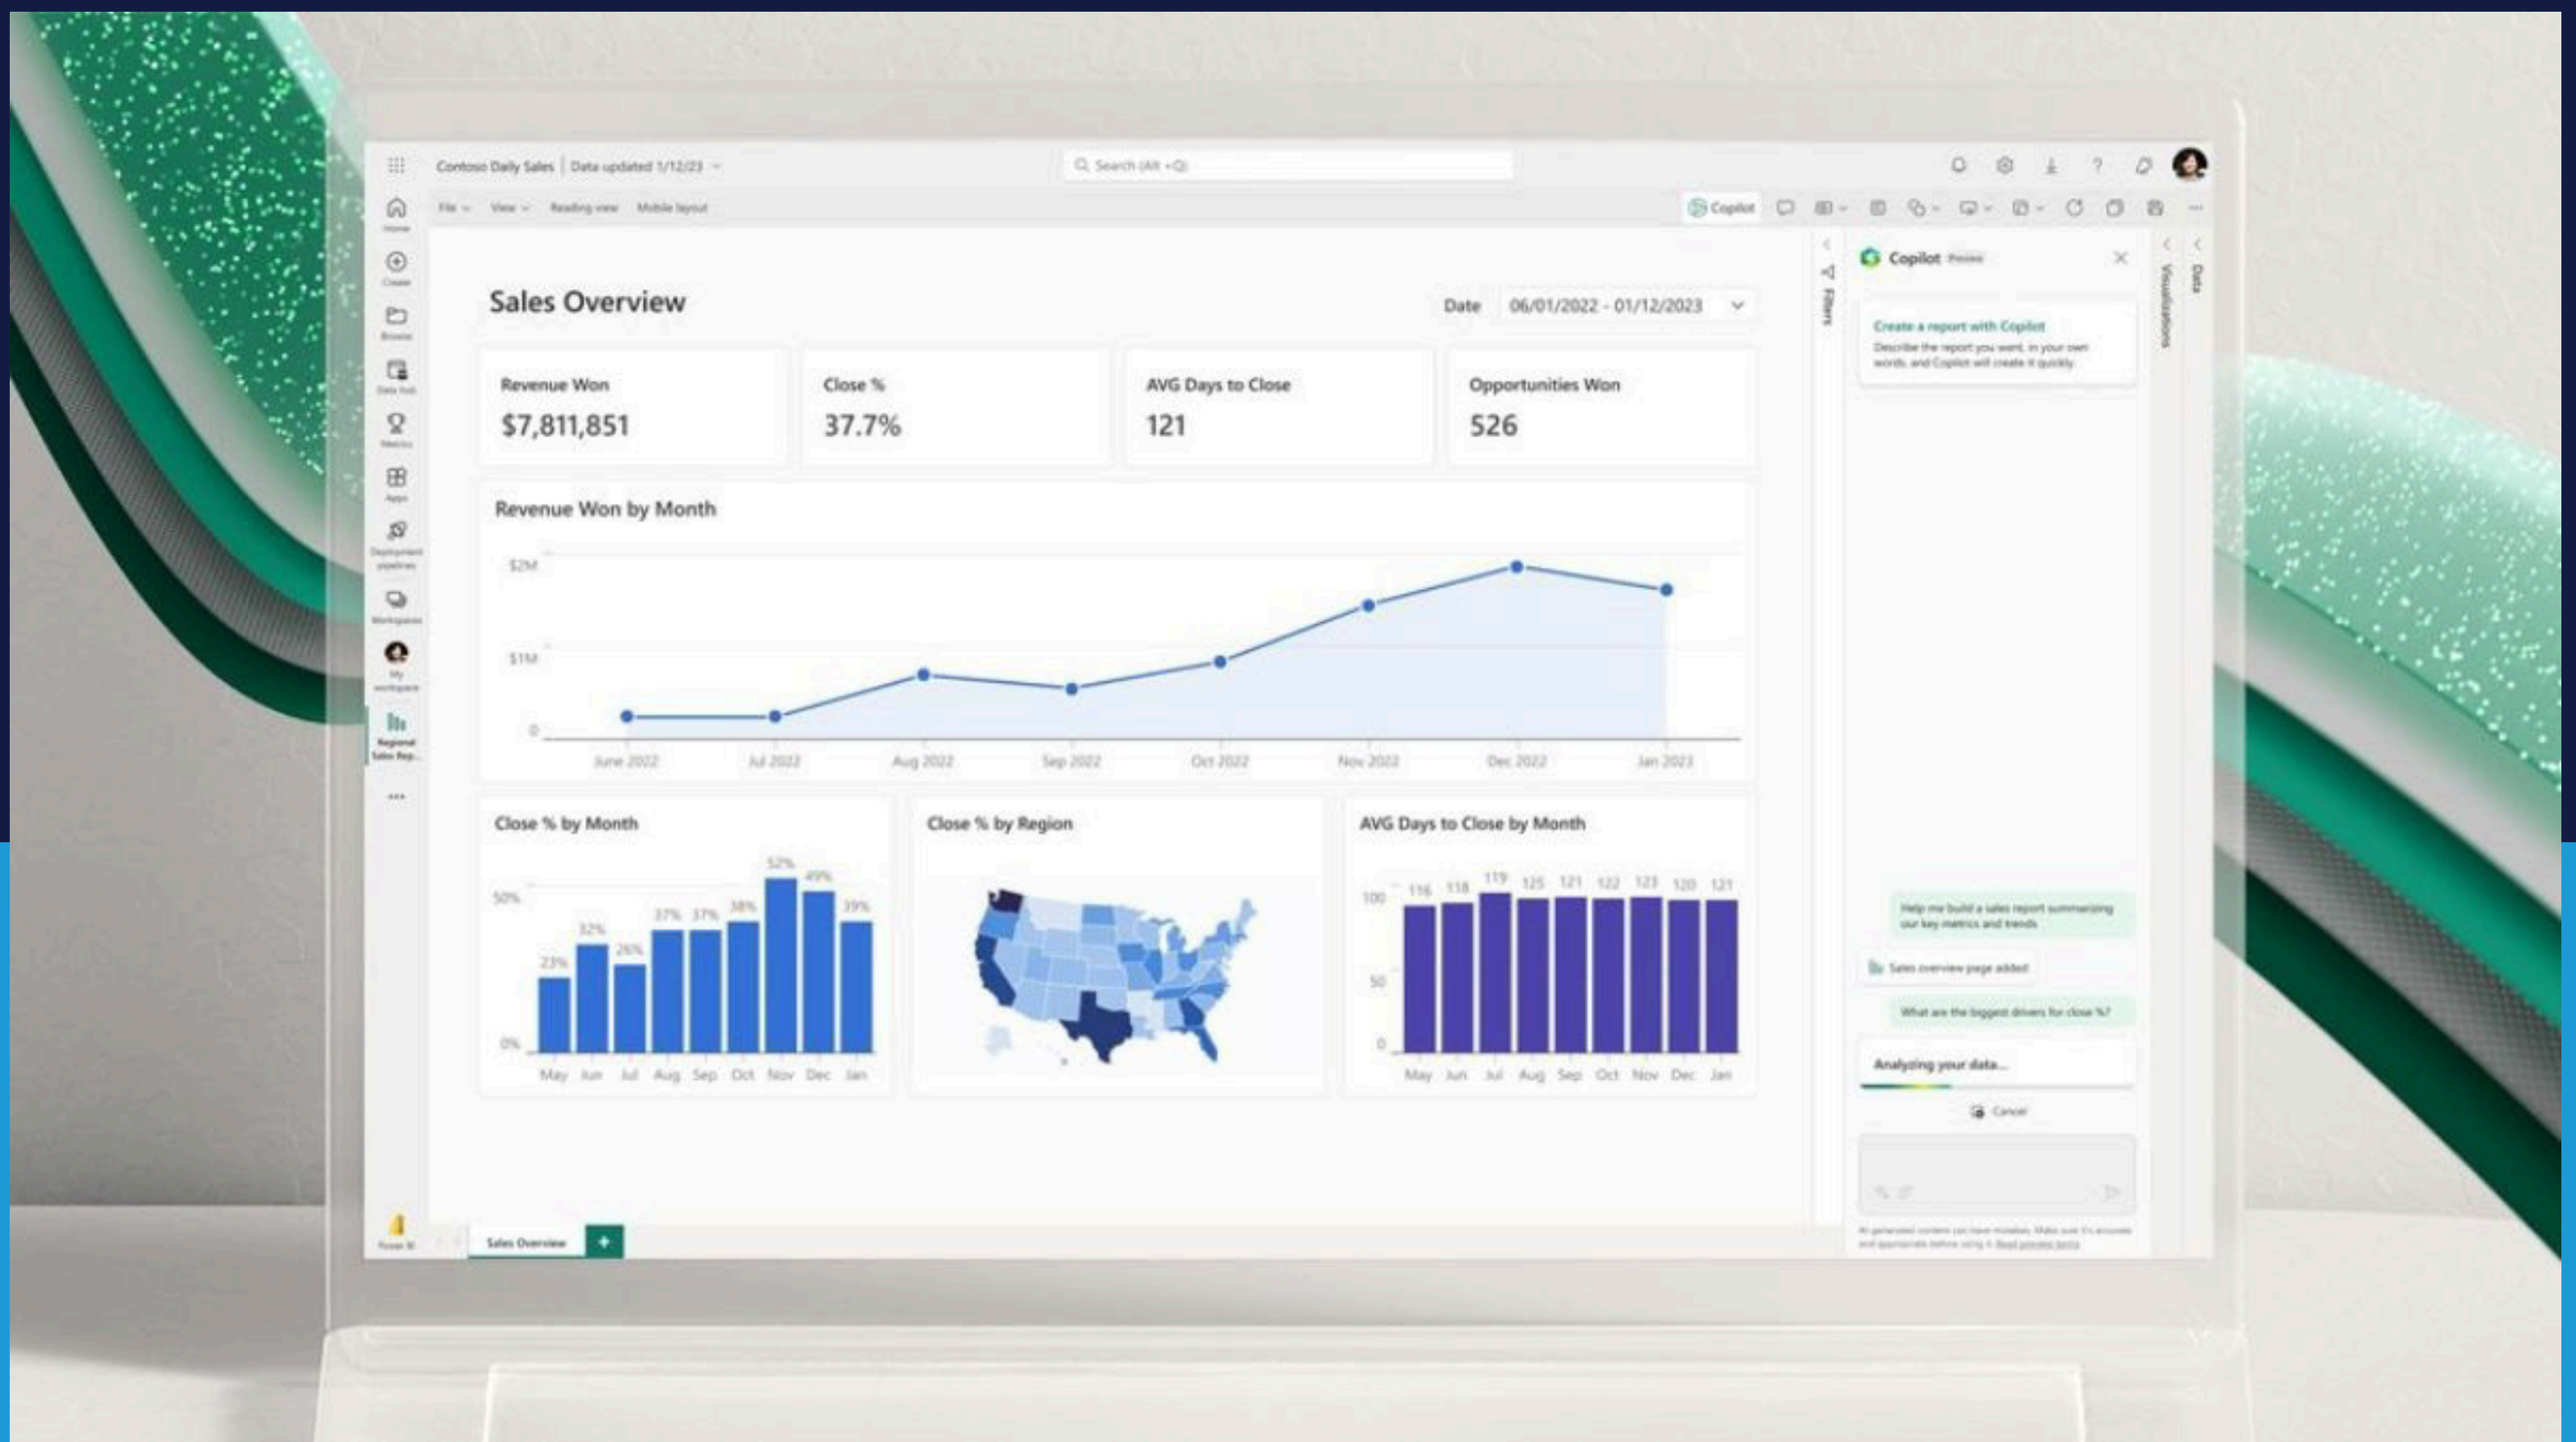

Inefficient collaboration and communication

How Microsoft Fabric Helped

- Data Connectivity without Copying
- Enabled cross-functional and cross-divisional integration
- Reduced total cost of ownership and increased return on investment
- Enhanced flexibility and scalability to meet changing business needs
- Improved productivity and creativity of employees and customers
